CURRENT LIST of MEDICAL LITERATURE

Vol. 6 June 9, 1944 No. 23

SUBJECT GROUPS ACCORDING TO JOURNALS

1. Anatomy; Histology
2. Anthropology; Ethnology
3. Archeology; Paleontology
4. Aviation Medicine
5. Bacteriology; Parasitology
6. Biology; Embryology
7. Bone; Joint; Extremities; Muscle
8. Cancerology
9. Cardiovascular System
10. Chemistry; Physics
11. Dentistry; Stomatology
12. Dermatology
13. Diagnosis; Clinical Methods
14. Dietetics; Foods; Nutrition
15. Digestive System
16. Endocrinology
17. Forensic Medicine; Toxicology
18. Genetics; Eugenics
19. Gynecology; Obstetrics
20. Hematology
21. History; Biography; Bibliography
22. Homeopathy; Osteopathy, etc.
23. Hospitals
24. Immunology; Serology
25. Industrial Hygiene; Sociology
26. Infectious Diseases; Epidemiology
27. Medicine
28. Metabolism
29. Military and Naval Medicine
30. Miscellaneous
31. Neurology; Psychiatry
32. Nursing
33. Ophthalmology
34. Otorhinolaryngology; Phoniatry
35. Pathology
36. Pediatrics; Child Welfare
37. Pharmacology; Pharmacy
38. Physiology
39. Psychology; Mental Hygiene
40. Public Health; Sanitation
41. Radiology; Phototherapy
42. Respiratory System
43. Surgery; Traumatology
44. Therapeutics
45. Tropical Medicine
46. Tuberculosis
47. Urology
48. Venereal Diseases; Sexology
49. Veterinary Medicine
50. Zoology

Privately published under the auspices of the

MEDICAL LIBRARY ASSOCIATION, INC.

AND THE

FRIENDS OF THE ARMY MEDICAL LIBRARY

Washington, D. C.

Printed in the U.S.A.

NEW BOOKS

Of the approximately 200 new books received by the Army Medical Library each month a few are being chosen, more or less at random, for brief mention here.

DAVIS, JOHN EISELE. Principles and Practice of Rehabilitation. New York, A. S. Barnes & Co., 1943, 211p.

Mental attitude and personality integration are the important factors in physical, mental and nervous reconstruction. A vital therapeutic process must be motivated and sustained by interest. In this volume the underlying mechanisms of behavior are made the basis for method and procedure. The most effective system of rehabilitation is that by which both the individual and the job become more sympathetically related.

AUBRY, MAURICE AND CHARLES FREIDEL. Chirurgie de la Face et de la Région Maxillo-Faciale. Paris, Masson et Cie, 1942, 690p.

This profusely illustrated treatise is the result of the collaboration of a laryngologist and a dentist. Since it was written during the war the bibliography is more restricted than would have been the case otherwise. In general the procedures described are those with which the authors are familiar but in the case of recent ones several are given and the authors recommend the one they consider best. In each case the principles guiding the diagnostic clinic are given and the conduct of the operating technic is described. A final chapter deals with restoration surgery of the face.

CHIRAY, M., GUY ALBOT AND G. F. BONNET. Les Complications Médicales de la Cholécystectomie. Paris, Masson & Cie, 1941, 170p.

In this monograph special attention is called to the fact that in the controversy concerning the complications following gall bladder removal, enough attention is not paid to the difference between the experimental excision of healthy, perfectly functioning, organs from animals, and the removal of diseased gall bladders from humans. The consequences of the latter may in fact be due to conditions antedating and outside the hepato-biliary system or resulting from the effects of a protracted morbid evolution upon the liver in particular and on the neighboring viscera. The etiology and pathology of the medical complications of cholecystectomy are discussed and practical clinical information given in regard to prophylaxis and therapy.

BATES, WILLIAM H. The Bates Method for Better Eyesight without Glasses. New York, Books, Inc., 200p.

This is the work referred to by Aldous Huxley in his book "The Art of Seeing" (Current List Vol. 4, Mar. 4, 1943). Since Dr. Bates died in 1931 this volume appears to be a re-issue of his original book.

FIESSINGER, NOËL. Syndromes et Maladies. Paris, Masson et Cie, 1942, 530p.

The chair of Clinical Medicine of l'Hotel-Dieu was inaugurated in 1823 and Professor Fiessinger is the eleventh occupant of this professorship. His inaugural lecture was to have been given on November 19, 1939 but due to the war it was postponed until October 13, 1940. As is the custom in France the inaugural lecture of a new professor is concerned largely with the preceding occupants of the position and an acknowledgment of gratitude to his teachers and all with whom he has been associated in his career. In the present case this is presented in the usual gracious manner in which such lectures are given. The remaining lectures in the present volume were given mostly during the period November 1940 - July 1941 and are concerned with Syndromes and Diseases of the liver, blood, endocrine glands and miscellaneous conditions such as urinary crises, scurvy, hernia, meningitis, pneumonia and heart affections.

CHABROL, ÉTIENNE. Pathologie du Foie et des Voies Biliaires. Etudes Cliniques et Biologique. Paris, Masson et Cie, 1941, 183p.

The determination of bilirubine and biliary salts in the blood, and the sulfophosphovanillic reaction, are described from the point of view of diagnosis and prognosis. It is considered that painful vesicles are not necessarily the result of infection. They may be due to cholemia, intestinal dyspepsia, stases without calculus and those of purely neuronegative origin. Appropriate therapeutic measures are given for the various vesicular reactions and the general rules which condition the reaction of the organism to jaundice of different origins are developed.

5. Bacteriology; Parasitology

J. Helminth., S. Albans, 1940, 21:

GOODEY, T. On the systematic relationships of the vinegar eelworm, Turbatrix aceti, and its congeners, with a description of a new species. 1-9.

On Rhabditis curvicaudata (Schneider) and R. paracilinta n. sp. 10-7.

A note on the feeding of the nematode, Anguillulina macrura. 17-9.

On the status of Aphelenchus agricola Haupas, 1900, with remarks on the genus Paraphelenchus. 20.

Anguillulina dipsaci in the inflorescence of onions and in samples of onion seed. 22-30, pl.

Tulip bulbs attacked by Anguillulina dipsaci. 30-2.

WALLACE, H. R., & WOOD, J. Stem eelworm in onion bulbs, probably seed-borne in origin. 33-6.

FENWICK, D. W. A refinement of Gemmell's single cyst technique. 37-41.

Note on the use of picric acid as a hatching agent. 41.

Zbl. Bakt., I. Abt., 1941, 148: (Nov.5) (Microfilm)

WALDMANN, O., PYL. G. /ET AL./ Die Entwicklung des Riemser Adsorbatimpfstoffes gegen Maul- und Klauenseuche und seine Herstellung. 1-15.

PATOCKA, F. Ueber eine erfolgreiche Uebertragung des Poliomyelitisvirus vom Menschen auf das Frettchen. 15-28.

Zbl. Bakt., I. Abt., 1941, 148:

VOGEL, H. Infektionsversuche an verschiedenen Bilharzia-Zwischen-wirten mit einem einzelnen Miracidium von Bilharzia mansoni und Bilharzia japonica. 29-35.

HORNBOSTEL, H. Ueber die bakteriologischen Eigenschaften des Darmsymbionten beim medizinischen Blutegel (Hirudo officinalis) nebst Bemerkungen zur Symbiosefrage. 36-47.

HOHN, J., & HERRMANN, W. Ammonnährboden oder Methode nach Bitter, Weigmann, Habs in der Diagnostik der Typhus-Paratyphus-Enteritis-Gruppe? 47-58.

FIALA, S. Ueber die Bedingung der rugosen Wachstumsform und des Zerfallphänomens bei Pseud. pyocyanea. 58-60.

ROUFOGALIS, S. Menschliches Fruchtwasser als Bakteriennährboden. 61-4.

Zbl. Bakt., I. Abt., 1941, 148: (Dec. 5) (Microfilm)

JANSEN, J. Tödliche Infektionen von Kaninchen durch ein filtrierbares Virus. 65-8.

HOFMANN, W. Weitere Untersuchungen über den Neurotropismus des Maul- und Klauenseuchevirus. 69-77.

VOGEL, H. Ueber den Einfluss des Geschlechtspartners auf Wachstum und Entwicklung bei Bilharzia mansoni und bei Kreuzpaarungen zwischen verschiedenen Bilharzia-Arten. 78-96.

LEINBROCK, Ueber den Kohlehydrat-Stoffwechsel der Colibazillen; vergleichende Untersuchungen über die Stärke der Säurespaltung von Mono-, Di-, Tri-, und Polysacchariden, Zuckeralkoholen und Glukosid durch Colistämme, die aus Stühlen derselben gesunden Erwachsenen in bestimmten Zeitabständen isoliert werden; Beziehungen der Art und Stärke dieser Säurespaltung zur chemischen Konstitution dieser Stoffe. 97-114.

BONETTI, E., & ILLENYI, A. Die Wirkung des Colchicins auf den Bakterienstoffwechsel. 114-7.

BELLER, K. Der Nachweis des Typus bovinus bei Lupuserkrankungen und anderen tuberkulösen Prozessen des Menschen. 118-24, 2 pl.

BEKKER, J. H. Ueber den fluoreszenzmikroskopischen Nachweis von Tuberkelbazillen im Sputum. 125-31.

HENKE, R. J. Untersuchungen über die Bakterien-differentialfärbung nach Dold. 132-46.

CICCONI, M. Ueber eine besondere Kälteempfindlichkeit von Prodigiosus- und Pyocyaneuskulturen auf Schrägagar; Hinweis auf einen Zusammenhang mit der Alkohol- und Phenolempfindlichkeit dieser Bakterien. 147-54.

DARANYI, J. Hitzeabtötungstemperatur der Colibakterien aus Kaltblütigen und warmblütigen Organismen. 155-9.

ANDRESEN, P. H. Anaerobe Züchtung; ein einfaches und schnelles Verfahren zur anaeroben Züchtung in Reagenzgläsern. 159.

Zbl. Bakt., 2. Abt., 1941-42, 104: (Jan. 15) (Microfilm)

BORTELS, H. Ueber Beziehungen zwischen epidemiologischem und meteorologischem Geschehen, unter besonderer experimenteller Berücksichtigung der Inhibinwirkung. 289-325.

FREI, H. Quantitative Untersuchungen über die Assimilation des elementaren Stickstoffe der Luft durch hautbildende Hefen. 326-65.

FUHRMANN, F. Aufbewahrungsgefäss für sterile Flüssigkeiten mit Tropfenentnahme. 366-8.

Zschr. Parasitenk., 1941-42, 12: (Dec. 22) (Microfilm)

VITZTHUM, H. Ueber den Symphorismus einiger unbekannter Tyroglyphiden-Deutonymphen. 307-16.

HEYMONS, R. Beiträge zur Systematik der Pentastomiden; zur Kenntnis der Samboniidae. 317-29.

Beiträge zur Systematik der Pentastomiden; die Typen-exemplare von Diesingia megastoma. 330-9.

LEHMENSICK, R., & SENADISAYA, P. Beiträge zur Epidemiologie der Trichinose. 340-61.

VITZTHUM, H. Ueber den Parasitismus der Feltria-Larven. 362-71.

ZUMPT, F. Die Rassenfrage bei Anopheles maculipennis Meigen; Beitrag zum Problem der Artbildung und Artbegrenzung. 372-87.

HASE, A. Weitere Beobachtungen über die Maskierung bei parasitaren Wanzen (Cimicidae und Triatomidae). 388-403.

SCHUURMANS STEKHOVEN, J. H., JR. Neue Beobachtungen an Strongyloides stercoralis Bovay. 404-18.

6. Biology; Embryology

An. Inst. biol., Mex., 1940, 11: No. 2

RUIZ O., M. Estudio de una nueva especie de levaduras del genero Torulopsis Berlese, aisladas de las cascaras de la piel humana. 369-82.

MICROFILM COPYING

Army Medical Library
Washington, D. C.

As a war emergency and as an aid to medical research, this Library is now making microfilms of the periodical literature without charge. Orders from our own and the allied Armed Forces are given priority, but all others will be filled as rapidly as circumstances allow.

This Library recognizes that microfilms permit the source literature in its possession to be more conveniently, economically, and widely placed at the disposal of those engaged in medical research than has ever been possible hitherto. This activity is considered as a legitimate extension to persons at a distance, of the service previously rendered without any charge to those who were able to come to the Library. It thus permits fulfilling more completely the purpose for which the Library exists, namely the diffusion and promotion of medical knowledge.

Since microfilm copying is being done by this Library to promote medical research in its broadest aspects, orders may be sent direct by individuals or through the librarians of hospitals, medical schools, and other institutions located in this country or elsewhere. In general, only the separate articles in the periodical literature will be copied. Long-run copying may be done in special cases but will be subject to such modifications as the facilities of the Library and the present restricted supply of film dictate.

In order to simplify the operation of the copying service, the use of order blanks will no longer be required. Titles and references to articles of which microfilm copies are desired should be written on letter paper and a carbon copy of each request should be included.

Governmental establishments and members of the armed forces need not include postage where films are requested. In the case of all others, this service, like interlibrary loans, is not granted the franking privilege, and postage in the following amounts should be sent -

For articles not exceeding 100 pages, send 1½¢
For articles not exceeding 400 pages, send 3¢
For articles over 400 pages, send 4½¢ stamps
